Fiery images as killer volcano that claimed 36,000 lives stirs once more

Back from the dead: The volcano has been growing out of its predecessor's remains since 1927

Risk: The smoking time-bomb is located on the Sunda Strait, between Java and Sumatra

Natural beauty: Photographer Marco Fuller captures a storm passing over the fiery cone

Dark times: Ominous clouds gather as rain lashes the region

Infamous: Anak Krakatoa caused 36,000 deaths after a fiery eruption in 1883 – the highest number of human deaths caused by a volcano ever

Bombshell: The power of the original blast was equivalent to 13,000 times that of the atomic bomb, Little Boy, which was dropped on Hiroshima during WWII

Threat: Embers glow on the surface of the newly active cone, causing locals to worry that another eruption is
