My 41 powerpoints can help!

Hello teachers

It would be so nice to hear from some of the teachers that have students that are using the powerpoint 1 and it is good that you have found your students enjoy using it in their free time. Please do not rush the lesson and let them practice it many times and until you hear that they are able to say the sounds correctly it is time to move to the next Power Points and get them started learning it.

The 41 PowerPoints are very useful and very suitable for Thai students. We had worked more than 6 months to finish them. From the start it has been very difficult and we had been very busy preparing the PowerPoint lessons. All of them were sent online to the native speaker to record sounds. It was very difficult sending such large files and it was a lot of hard work, but now we have a very useful tool for Thai teachers to use in their beginner English classes.

All of the 41 PowerPoints had been used by my students last year and I can guarantee that my students from the first grade are able to read the hardest stories in the last power points as well.

I would be very pleased to share what I have to help the English teachers in Thailand. The materials are a very useful tool for students to learn English. If you want the Power Points for your students please feel free to request them at no charge anytime by my email address as: wipapansu@yahoo.com

Bye for now.

Until the next time,

Kroothairaitiamtan
