

การสร้างปฏิทิน Online ครับ

นำเสนอเมื่อ : 20 พ.ย. 2551

การสร้างปฏิทิน Online ครบ

การสร้างปฏิทิน Online

สร้างไฟล์ calendar.php พิมพ์ตามนี้เลยครับ

<?

```
$a= date(j); // , 1 to 31
```

```
$b = date(a); // am,
```

```
$c = date(A); // AM,
```

```
$d = date(B); // Swatch Internet time 000 -999
```

```
$e = date(d); // , 01 to 31
```

```
$f = date(D); // , sat
```

```
$g = date(F); // , November
```

```
$h = date(g); // , 1 through 12
```

```
$hh = date(G); // , 0 through 23
```

```
$i = date(h); // , 01 through 12
```

```
$j = date(H); // , 00 through 23
```

```
$k = date(i); // , 00 to 59
```

```
$l = date(l); // 0, 1 if Daylight Savings Time, 0 otherwise.
```

```
$m = date(l); // , Sunday through Saturday
```

```
$n = date(L); // 0, 1 if it is a leap year, 0 otherwise.
```

```
$o = date(m); // , 01 through 12
```

```
$p = date(M); // , Jan through Dec
```

```
$q = date(n); // , 1 through 12
```

```
$r = date(o); // Example: +0200
$s = date(r); // Example: Thu, 21 Dec 2000 16:01:07 +0200
$t = date(s); // 00 through 59
$u = date(S); // st, nd, rd or th. Works well with j
$v = date(t); // 28 through 31
$w = date(T); // time zonesetting Examples: EST, MDT ...
$x = date(u); // See also time()
$y = date(w); // 0 (for Sunday) through 6 (for Saturday)
$z = date(W); // Example: 42 (the 42nd week in the year)
$aa = date(y); // Examples: 99 or 03
$bb = date(Y); // Examples: 1999 or 2003
$cc = date(z);
$dd = date(Z);
```

```
if(!$mon){
    $mon = $o ;
}
else{
    $mon = $mon ;
}

if(!$year){
    $year = $bb ;
}
